Will your dance floor fit?

Take this sheet to your venue visit, or fill in the details you already know. Unknown is fine: you can still ask Twilite for a quote.

1. START WITH THE ROOM

Event date / venue / room name

Clear space available for the floor: width ____ m x depth ____ m

Measure the usable space after accounting for tables, chairs, the DJ or band, doors and columns. The room's full dimensions are not the same as the available floor space.

2. COMPARE THE FLOOR OPTIONS

12 x 12 ft	14 x 14 ft	16 x 16 ft
3.66 x 3.66 m	4.27 x 4.27 m	4.88 x 4.88 m

Nominal floor dimensions, rounded to 2 decimal places. Edging and surrounding space are extra. These measurements do not establish room capacity or confirm a fit.

3. ADD THE PRACTICAL DETAILS

Existing surface / level changes / stairs or narrow access

Setup access time / room turnaround / collection restrictions

Mark on your plan: doors, tables, chairs, DJ or band, photo area, columns, and clear routes for guests and staff. Ask the venue to check the arrangement.

Next step: include any room/access notes in "Anything else we should know?" when requesting your quote. Final size, edging, installation and availability are confirmed before booking.

Cut out. Compare. Check.

Use these squares on a confirmed 1:50 room plan or the grid on page 3. Print single-sided. Do not use "fit to page" or resize to another scale.

12 x 12 ft

3.66 x 3.66 m

Nominal floor only

No edging or clearance included

1:50 | printed side 73.152 mm

14 x 14 ft

4.27 x 4.27 m

Nominal floor only

No edging or clearance included

1:50 | printed side 85.344 mm

16 x 16 ft

4.88 x 4.88 m

Nominal floor only

No edging or clearance included

1:50 | printed side 97.536 mm

Check your print scale
The line below must measure exactly 50 mm (5 cm). If it does not, reprint at actual size.

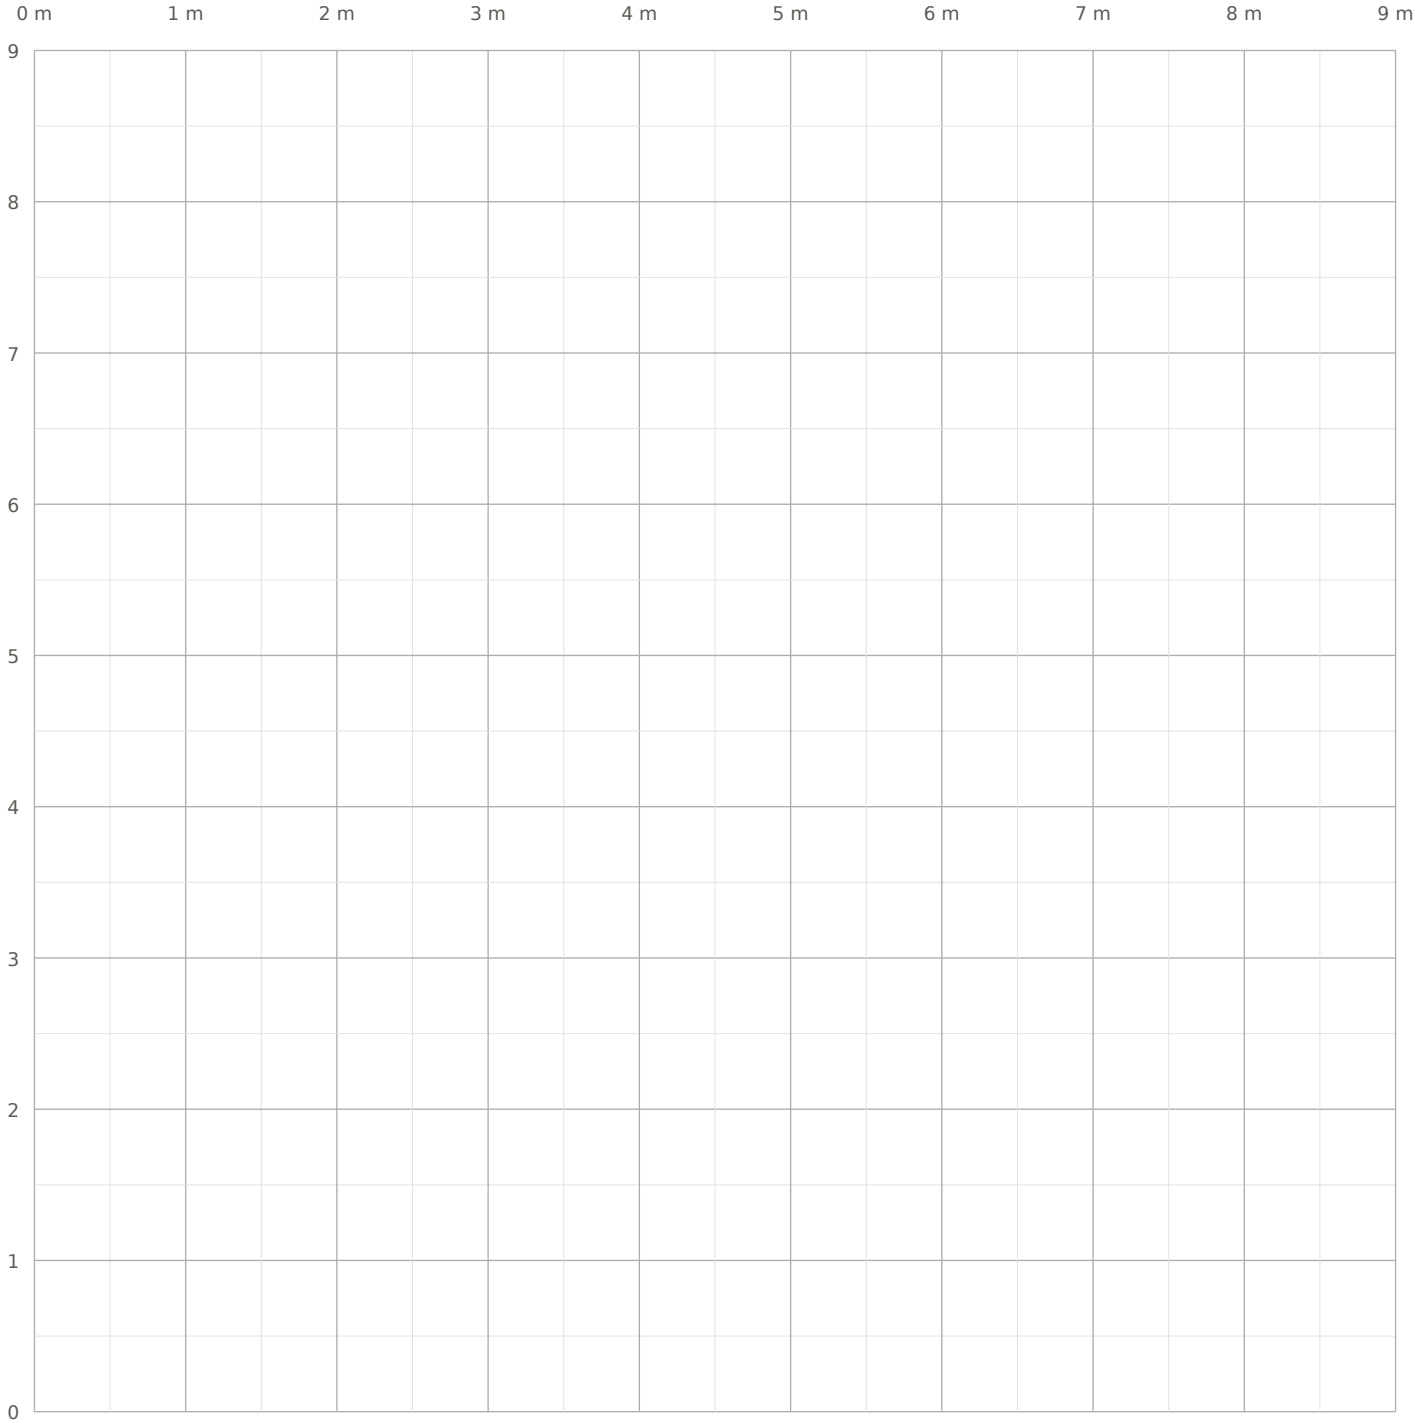

50 mm = 2.5 m at 1:50

Keep space beyond each square for edging, equipment and movement. Twilite and your venue must confirm the final arrangement.

This is a planning aid, not an installation drawing. Do not assume an edge-to-edge match means the floor fits.

Sketch the usable space.

Each small square represents 0.5 m. Two squares represent 1 m. Use a ruler for measurements, then move the floor templates around your plan.

Grid covers 9 x 9 m. For a larger room, use a venue plan at a verified 1:50 scale; do not squash the drawing to fit. Draw the room outline, doors, fixed furniture and equipment.

Print check: this line must measure 50 mm.
